

WHAT IS CLAIMED IS :

1. A transfer sheet comprising :

- a hair transplant sheet having a base sheet, and an acrylic solvent cohesive layer parting layer on which a fiber layer is provisionally bonded;
- a toner image fixed on the fiber layer of the hair transplant sheet by an electrophoto copying machine using a toner;
- at least one acrylic ester resin binder layer which is placed on the fiber layer having the fixed toner image; and
- a hot-melt adhesive layer which is placed on the binder layer.

2. A transfer sheet comprising :

- a hair transplant sheet having a base sheet, and an acrylic solvent cohesive layer parting agent on which a fiber layer which is separate from the base sheet is provisionally bonded;
- a toner image fixed on the fiber layer of the hair transplant sheet by an electrophoto copying machine using a toner;
- a transparent acrylic ester resin binder layer which is placed on the fiber layer having the fixed toner image;
- a colored acrylic urethane resin which is placed on the transparent acrylic ester resin binder;

and

a hot-melt adhesive layer is also placed on the colored acrylic urethane layer.

3. A transfer sheet according to claim 1, wherein an electrophoto copying machine is a color copy machine using a toner.

4. A transfer sheet according to claim 2, wherein an electrophoto copying machine is a color copy machine using a toner.

5. A transfer sheet comprising:

a hair transplant sheet comprising an acrylic solvent cohesive layer parting agent on which a fiber layer is provisionally bonded which is placed onto a base sheet;

a toner image fixed on the fiber layer with a toner by a photo copying machine;

at least one acrylic ester resin layer binder layer placed on the fiber having the toner image; and

a hot-melt adhesive layer also placed on the binder layer;

wherein the toner image and the fiber layer can be transferred on a subject receiver.

6. A transfer sheet comprising:

a hair-like transplant sheet comprising an acrylic solvent cohesive layer parting agent on which a fiber layer is provisionally bonded which is placed onto a base sheet;

a toner image fixed on the fiber layer with a toner by a photo copying machine;

a transparent acrylic ester resin layer as a binder layer placed on the short fiber having the fixed toner image;

a colored acrylic urethane resin layer placed on the transparent binder layer;

a hot-melt adhesive layer also placed on the colored layer; and

wherein the toner image and the short fiber layer can be transferred on a subject receiver.
